Education

Arizona State University

Master of Science in Data Science — GPA: 4.0/4.0

May 2026

Tempe, AZ

Dayananda Sagar University

Bachelor of Technology (B.Tech) in Computer Science and Engineering — GPA: 8.87/10

May 2023

Bengaluru, IN

Professional Experience

Data Science Intern

Jun 2025 – Jul 2025

Hissa by RuleZero

Bengaluru, IN

- Engineered a modular machine learning platform using **Python** and **scikit-learn** to predict startup exits, valuations, and exit timelines on **Tracxn** data, achieving **85%** exit classification accuracy, which enabled scalable, data-driven benchmarking workflows.
- Delivered a production-style analytics application using **Streamlit** with CSV upload and manual input support, integrating **SHAP** explainability, versioned model persistence, and structured outputs for analyst reporting, reducing startup screening time by **20%**.
- Partnered with finance and strategy teams to translate business requirements into statistical models used for startup evaluation and screening.

Data Science Research Assistant

Jan 2025 – May 2025

Arizona State University

Tempe(AZ), USA

- Constructed **ETL** pipelines to clean, join, and aggregate **3+** heterogeneous eviction datasets using **Python** and **SQL**, and produced interactive **Tableau** dashboards covering **hundreds of census tracts** to identify high-risk eviction zones across Maricopa County.
- Trained eviction risk prediction models using **XGBoost**, **CatBoost** and regression techniques on socio-economic indicators, achieving a **15% improvement** in predictive performance over baseline models, which informed equitable housing policy interventions.

Software Engineer(Full Stack)

Feb 2023 – Jul 2024

Mercedes Benz Research and Development

Bengaluru, IN

- Developed a **Python**-based GenAI chatbot deployed on AWS that enabled **50+ vehicle technicians** to retrieve repair procedures from internal manuals using RAG and generate estimated repair times, improving technician workflow efficiency by **20%**.
- Architected **RESTful** backend services backed by **NoSQL** (MongoDB) data within a **scalable, fault-tolerant backend**, leveraging **asynchronous request handling**, reducing response latency and improving frontend-backend data access efficiency by **25%**.
- Implemented **25+** features using **React.js** (TypeScript) and a **Kotlin** backend in a service provider validation system, streamlining request flows and leveraging asynchronous processing to reduce end-to-end request latency by **35%**.
- Improved code quality by increasing automated test coverage by **30%** through unit testing and **SonarQube** quality gates, reducing regressions and improving long-term maintainability.
- Migrated **CI/CD** pipelines from **Jenkins** to **GitHub Actions** on **AWS** by defining workflow YAMLs for automated builds, test execution, and environment-specific deployments, supporting end-to-end **SDLC** workflows and reducing deployment time by **20%**.
- Applied **Git**-based version control workflows across multiple teams, managing feature branches, peer reviews, and merge requests to maintain code stability and delivery quality.

Projects

Real-Time Taxi Network Graph Analytics Pipeline

Oct 2025 - Nov 2025

- Architected a real-time graph analytics pipeline using **Apache Kafka**, **ZooKeeper**, **Kubernetes**, and **Neo4j** to process **millions of NYC taxi trip records**, applying **PageRank** and **BFS** to identify high-traffic locations and key route connectivity patterns.

EmotiLearn: Bridging the Emotional Gap in Virtual Education

Feb 2025 - May 2025

- Designed a multimodal deep learning framework using **PyTorch** and **TensorFlow** for student engagement detection, combining **3D CNNs** and **GRUs** for video with **Wav2Vec** for audio, achieving a **20%** accuracy improvement in experimental evaluation.

Technical Skills

Languages: Python, Java, SQL, Kotlin, JavaScript, R, C

Distributed Systems & Cloud: AWS, REST APIs, CI/CD, Docker, Kubernetes, GitHub Actions, Jenkins

Backend & Frameworks: FastAPI, Flask, Django, React.js

Machine Learning & Data Science: PyTorch, TensorFlow, scikit-learn, Pandas, NumPy, OpenCV, Keras, transformers

Databases: PostgreSQL, MySQL, NoSQL (MongoDB)

Data Visualization & Productivity: Tableau, Power BI, JIRA, Confluence, Kanban

Soft Skills: cross-functional collaboration, technical communication, requirements translation, ownership mindset, agile teamwork

Certifications

AWS Educate – Introduction to Cloud 101; AWS Educate – Getting Started with Storage; AWS Educate – Machine Learning Foundations; SQL (Basic) – HackerRank; Working with the OpenAI API – DataCamp
